

## Q100

### MONITOR CAGE

Covers with multiple 1/4" and 3/8" mounting threads

V-lock battery mount comes with two B interface at the both sides

Comfortable, adjustable rubber handgrips allow for portability

Designed to fit monitors up to 9", this Director's Monitor Cage with Rubber Handgrips from E-Image helps directors stay mobile while managing a complex production. Constructed with durable, lightweight aluminum, the cage is modular and adjustable to support a monitor, a battery mount, and even a wireless transmission system.

At the center of the cage system are the main horizontal cheese rails with multiple 1/4"-20 and 3/8"-16 mounting threads. On the back, a cheese plate with multiple 1/4"-20 and 3/8"-16 threads allows you to mount the included V-mount battery plate or you can mount a wireless receiver. The cage's open design allows cabling to run through with plenty of room for adjustment. Two horizontally adjustable rubber handgrips attach to the two side rods.

On the front, the center baseplate provides a mounting screw and two pads to protect your monitor base. The handgrips feature locking levers for rotation.
